

smoothwall

Identify when users engage in **risky behavior** with Safeguarding reports.

With the rise of mass tragedy and community-based threats, the web increasingly becomes a tool to enable violence and harm.

Get ahead of these kinds of problems with Safeguarding. Smoothwall Safeguarding gives you the tools you need to identify risky behavior using a predefined lists of criteria that ties into browsing behavior:

- Abuse
- Adult Content
- Bullying
- Criminal Activity
- Radicalization
- Substance Abuse
- Suicide

The categories belonging to each ruleset are subject to change and constantly evolving.

With Safeguarding reports, administrators are **empowered** with the knowledge to make a difference.
